

SUMIT BHATT

QA Automation Engineer | AI-Enabled Testing | SDET

Lucknow, India | sbhatt.pwn@gmail.com | 9621067339 | linkedin.com/in/sumitbhattpwn

PROFESSIONAL SUMMARY

QA Automation Engineer with 3+ years of experience testing web, mobile, and API applications across CRM, healthcare, and enterprise platforms, expanding into AI-assisted testing workflows. Applies automation-first thinking to accelerate test design, script maintenance, and defect triage using Selenium WebDriver (Java) and Playwright (JavaScript) frameworks built on the Page Object Model. Integrates automated suites into GitHub Actions CI/CD pipelines, validates REST APIs with Postman, and verifies backend data with SQL. ISTQB Foundation Level certified, with growing exposure to LLM-assisted test generation and REST Assured.

TECHNICAL SKILLS

- Automation & Testing: Selenium WebDriver, Playwright, TestNG, Appium (basics), JMeter, Postman, REST API Testing
- Languages: Java, JavaScript, SQL, Python (basics), HTML/CSS
- CI/CD & Tools: GitHub Actions, Jenkins, Git, GitHub, JIRA, Confluence, Eclipse, VS Code
- Databases: MySQL, MongoDB
- Practices: Agile/Scrum, Page Object Model, Cross-Browser Testing, Regression & Smoke Testing, Role-Based Access Testing
- AI-Assisted Testing: LLM-assisted test case generation, prompt engineering for test design, AI-augmented script maintenance and defect triage (hands-on/growing exposure)

PROFESSIONAL EXPERIENCE

QA Engineer — Jamtech Technologies Pvt. Ltd.

Aug 2024 – Present

- Designed and maintained a Selenium WebDriver (Java/TestNG) suite of 50+ automated test cases for web applications, structured with the Page Object Model to cut script maintenance time as the application evolved.
- Validated 20+ REST API endpoints using Postman and contributed to the API-level automation strategy, improving early defect detection before UI testing began.
- Executed role-based access, UI/UX, and cross-browser testing across 3+ releases per quarter, ensuring consistent functionality across user roles and environments.
- Integrated automated regression suites into GitHub Actions CI/CD pipelines, enabling test execution on every build and cutting manual regression turnaround from days to hours.
- Used Git for version control and JIRA for bug tracking and sprint planning, collaborating with developers and business analysts to resolve 15+ defects per sprint.

Quality Analyst — Unicode Systems Pvt. Ltd.

May 2023 – Aug 2024

- Built 40+ Selenium WebDriver + TestNG automation test cases for HR and healthcare modules, supporting functional and regression coverage across releases.
- Validated APIs and backend data flows using Postman and SQL (MySQL) queries across 4 core modules — payroll, EMR, billing, and recruitment — to verify data integrity.
- Performed functional, regression, and UI testing across 5+ applications, helping the team maintain release quality in a fast-paced Agile environment.
- Participated in Agile Scrum ceremonies including sprint planning and reviews every 2 weeks, coordinating test priorities with developers and product stakeholders.

KEY PROJECTS

Bull CRM

- Developed and maintained a scalable Selenium WebDriver (Java) automation framework using the Page Object Model, ensuring critical user journeys were validated before every deployment.

Healthcare Management System

- Automated test cases for EMR, billing, and appointment modules using Selenium and SQL validations, with UI and backend checks tracked through JIRA.

EDUCATION

B.E. in Computer Science

Shri Ram Murti Smarak College of Engineering and Technology, Bareilly — 2019 to 2023

CERTIFICATIONS

ISTQB Foundation Level (2025) • Java Programming • Selenium 4 with Java • Postman API Fundamentals (Student Expert) • McKinsey.org Forward Program
